Sequence 3117, Application PC/TUS0326780
GENERAL INFORMATION:
APPLICANT: FIPERIME THERAPEUTICS, INC.
TITLE OF INVENTION: HUMAN POLYPEPTIDES ENCODED BY POLYNUCLEOTIDES AND METHODS OF TITLE OF INVENTION: THEIR USE
FILE REPREMENCE: 08940.0014-00304
CURRENT PELLING DATE: 2003-08-28
PRIOR APPLICATION NUMBER: 60/406,616
PRIOR PILING DATE: 2002-08-29
PRIOR APPLICATION NUMBER: 60/406,579
PRIOR APPLICATION NUMBER: 60/406,579
PRIOR APPLICATION NUMBER: 60/406,579

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Publication No. US20030166846A1
GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: PROTEIN SPECIALITIES LID.
APPLICANT: HCR RESEARCH AND DEVELOPMENT LIMITED PARTNERSHIP
TITLE OF INVENTION: SELF-ALIGNING PEPTIDES MODELED ON HUMAN ELASTIN AND
TITLE OF INVENTION: OTHER FIBROUS PROTEINS
FILLS REPERBNCE: 041082/0112
CURRENT APPLICATION NUMBER: US/09/964,662
CURRENT FILLING DATE: 2003-05-08
PRIOR APPLICATION NUMBER: US/09/340,736
PRIOR PILING DATE: 1999-06-29
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Gaps

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
